

Trần Cao Duy Trường

React Native Developer

Ho Chi Minh City, Vietnam · +84 367 243 065 · duytruong8a1@gmail.com

SUMMARY

React Native developer with 4 years of professional experience building and shipping iOS and Android applications in production healthcare and consumer products. Strong in JavaScript and TypeScript, RESTful API integration, Redux-Saga state management, and release workflows across Google Play and the App Store. Comfortable owning user-facing features end-to-end, collaborating in Agile teams, and communicating in English during technical discussions.

SKILLS

Mobile: React Native (4 years), iOS and Android app lifecycle, component architecture

Also: Flutter for cross-platform mobile delivery and API-integrated product modules

Languages: JavaScript (ES6+), TypeScript

Integration: RESTful APIs, authentication flows, Firebase, push notifications (OneSignal)

State & patterns: Redux-Saga, modular feature-based structure, debugging and performance tuning

Release: App Store Connect, Google Play Console, CodePush, Git-based delivery

Collaboration: code reviews, cross-functional communication, Agile delivery in English

EXPERIENCE

Develop.Software LLC — React Native Developer · 2024–2025

- Delivered React Native features and maintained production mobile codebases for client products.
- Integrated REST APIs, coordinated release quality, and collaborated with distributed teams in English.
- Site: <https://www.develop.software/>

BringHacks — Part-time React Native Engineer · 2023–2024

- Shipped React Native features for a live consumer app on Android and iOS.
- Handled API integration, iterative testing, bug fixing, and store release cycles.

Beings — React Native Engineer (calling / streaming) · 2023–2024

- Contributed to real-time communication products with mobile integration and reliability improvements.
- Worked in a distributed team with English-first technical coordination.

Medpro — React Native Developer · 2021–2023

- Built and maintained React Native healthcare apps for booking and medical workflows.
- Stack: TypeScript, Redux-Saga, REST APIs, Firebase, OneSignal, and CodePush in production.
- Published and maintained updates on Google Play and App Store for BV Mắt, UMC, and UMC2.

SELECTED PROJECTS

• **Medpro apps (BV Mắt / UMC / UMC2)** — RN: React Native, TypeScript, Redux-Saga; BE: Node.js, REST APIs for booking and medical workflows; released on Google Play and App Store.

- **BringHacks (Tips & Quotes)** — RN: React Native consumer app (Android/iOS); BE: Firebase-backed services and React admin data flows with production API integration.
- **Beam** — RN: React Native communication UI with WebRTC-oriented mobile flows; BE: REST API and real-time streaming/voice service integration.
- **Olivia** — RN: React Native and React Three mobile experience for 3D chat/video; BE: API services and OpenAI/LLM-backed conversation endpoints.
- **PakyawKalabaw** (Philippines) — RN: React Native mobile delivery; BE: C# backend services and REST API integration. <https://play.google.com/store/apps/details?id=com.developsoftware.pakyawkalabaw> · <https://pakyawkalabaw.com/>
- **HLMart** (Vietnam) — RN: e-commerce mobile features with TypeScript; BE: WordPress/WooCommerce REST APIs and order/catalog data integration. <https://hlmart.vn/>

EDUCATION

Ho Chi Minh City University of Technology (HCMUT) — Graduate
GPA 3.3/4.0 (8.0/10) · OISP Scholarship, Bach Khoa University

OTHER

IELTS 6.5 (2019–2021) · 2nd place, Minathon 2023 (ATWARE)
Date of birth: 12 October 2002
